

RRT Wire Antenna Kit (WAK)

Radio Reconnaissance Technologies Inc. has continued its successful line of industry standard antenna kits with the Wire Antenna Kit (WAK). This 2 case solution provides operators with the necessary supplies required to successfully conduct collection or communications operations where a purpose-built antenna is needed.

The kit contents provide the user enough tools and materials to make multiple types of antennas suitable for any operation from rural field, concealed urban to commercial “ham” radio.

Contents of WAK are subject to change.

Features include:

- VSWR tester
- Large selection of male and female standard connectors
- Ground plane material
- Screwdrivers, soldering set, tools for stripping/crimping/cutting/measuring
- Wire and cables
