

## **DESK** **DF Environment Simulation Kit**

### **OVERVIEW**

RRT DF Environment Simulation Kit (DESK) is composed of a selected assortment of transceivers, antennas and other related communications equipment required to quickly establish multiple, realistic Radio Frequency (RF) practice environments in support of training in Direction Finding or other RF test evolution requirements. The DESK provides users with the ability to create realistic Push to Talk (PTT) signals as low as 29 MHz and as high as 500MHz. The DESK is further housed in a Pelican® custom foam transit case to ensure accountability and safety of all components during
